**18.135 HIGHWAYS** – To discuss the report regarding speeding on The Ridge and agree any actions: The Principal Engineer of Wiltshire Council Salisbury Transportation Team carried out a site visit paying particular attention to signage, the Bowers Hill junction, bus stop on The Ridge and the shop.

A speed limit covers a length of road irrespective of the number of villages it passes through and the large terminal signs are only used at the very start and end of the restriction not at the entry to each village. There are several areas that do not have repeater signs due to the fact that there is a system of lighting in place. A system of lighting indicates to the driver that it is 30mph and not permitted by law to erect any kind of 30 repeater signage where lighting exists. It was agreed to ask how much it would cost for Wiltshire Council to carry out a review on the number of repeater signs. An advisory 20mph could be requested near the school but this would need to be actioned by the school. It was agreed the Clerk contact the school. The informal crossing near the Bowers Hill junction requiring maintenance will be reported via MyWiltshire App. The Engineer stated the number of crossing movements at the bus stop will be very low and the visibility in either direction for both pedestrians and drivers is good. A report was carried out in 2006 to look at area around the shop and all the advice contained in that report is still valid. It was agreed that speed enforcement is the solution but with a lack of police presence the other options are Community Speedwatch and the possible purchase of a Speed Indicator Device (SID). It was agreed to pursue the setting up of a Speedwatch team, the purchase of a SID to be included on the next agenda and to enquire about costing of village gates to remind people they are entering a village area.
